

REMARKS

Applicant expresses deep appreciation for the comprehensive official action and the very specific statement of the objections to the claim.

Claim 1 has been amended to overcome the objections thereto, specifically defining the concentration of active ingredient and the nature of application of the composition, namely topical application to the inflamed skin or membrane.

It is believed that the amendment overcomes all points of rejection and that the application is now in condition for allowance.

Reconsideration and allowance are respectfully requested.

Respectfully submitted,

GRANT L. HUBBARD
